## LANDFILL GROUP

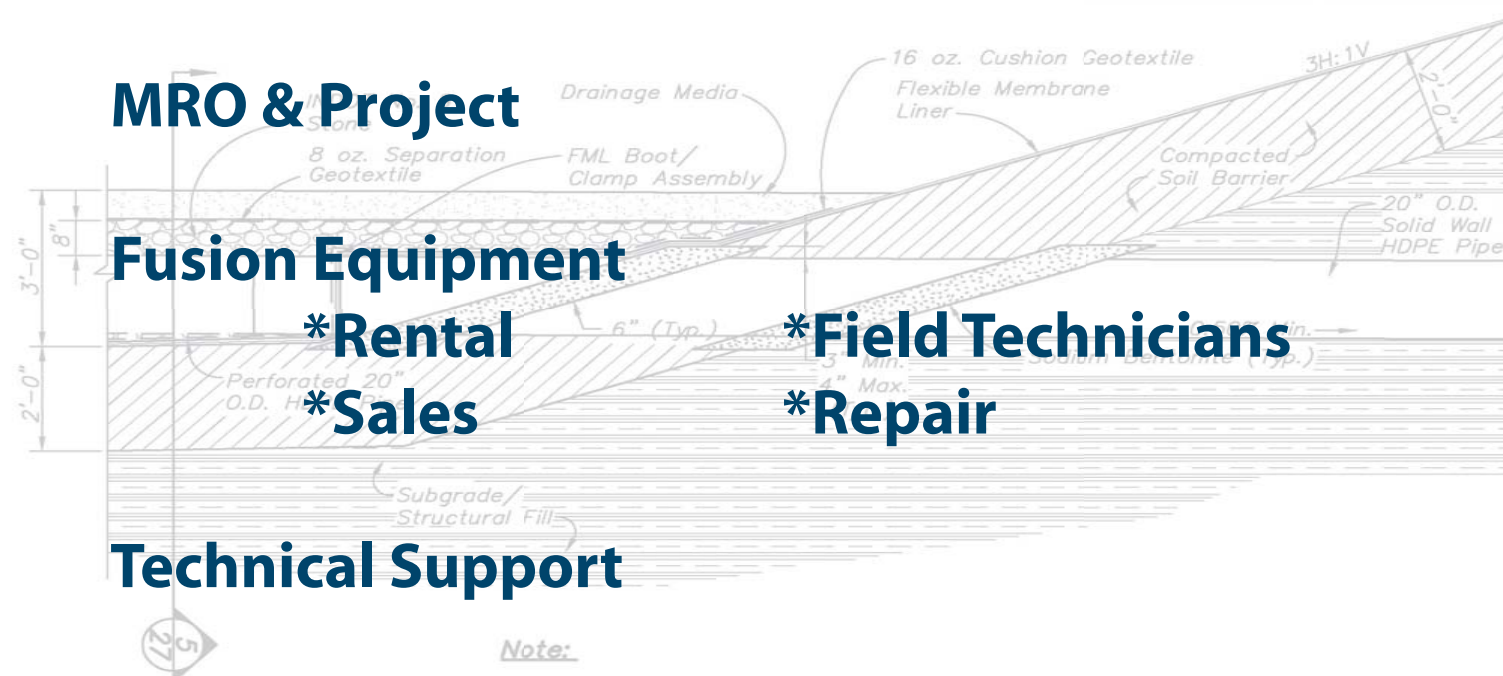

### MRO & Project

### Fusion Equipment

**\*Rental**  
**\*Sales**

**\*Field Technicians**  
**\*Repair**

### Technical Support

**Note:**

1. Transition pipe bedding from 3" of INDOT No. 9 Stone under pipe to placement of pipe directly on liner surface within 10' of pipe penetration through liner.

***Our Organization:***

Ferguson Industrial Plastics operates as a division of Ferguson Enterprises to provide total HDPE piping supply solutions to North America. It is this network of Ferguson branches and their subsidiaries that allows us to succeed in every market utilizing HDPE products. Our substantial investment of inventory and fusion equipment across North America is a testament to our commitment to the HDPE industry.

***Our Experience:***

The number of years of HDPE experience in the Ferguson business groups is remarkable. As Ferguson grew through acquisitions of privately held companies so did our HDPE knowledge. It is the function of Ferguson Industrial Plastics to consolidate these resources into a dynamic operation concerned only with success of HDPE customers and their projects.

***The Landfill Group:***

Some markets require support and service that is above and beyond most piping applications. Ferguson has always provided staffing groups to focus on these markets. Our Industrial Mining Group is an example of this. The Landfill Group was established to provide supply solutions to the landfill market on a scale that is unmatched.
